Logistics typically refers to activities that occur within the boundaries of a single organization and Supply Chain refers to networks of companies that work together and coordinate their actions to deliver a product to market. Also, traditional logistics focuses its attention on activities such as procurement, distribution, maintenance, and inventory management. Supply Chain Management (SCM) acknowledges all of traditional logistics and also includes activities such as marketing, new product development, finance, and customer service. While on-time delivery of intact packages has always been important throughout the supply chain, it has become even more mission-critical in recent years as omnichannel commerce, with its same-day home or retail delivery of customized products ordered from smartphones, becomes more common. Suppliers, manufacturers, distributors, and retailers have had to improve their logistics processes to meet the demand for quicker, more convenient delivery of a wider variety of goods. They also have had to better integrate their processes and systems to improve supply chain visibility. Supply Chain Management (SCM) includes a broad area that covers both manufacturing and service industries, involving the functions of sourcing, materials management, operations planning, distribution, logistics, retail, demand forecasting, order fulfillment, and more.

The supply chain manager tries to minimize shortages and keep costs down. The job is not only about logistics and purchasing inventory. Transportation and warehousing are the two major functions of logistics. Transportation management focuses on planning, optimizing and executing the use of vehicles to move goods between warehouses, retail locations and customers.

ABOUT COURSE

Eligibility

IIRDC Diploma	: 10/ +2/ Bachelor's degree, Master's degree, PHD, PDF etc...
Advanced Skill - IIRDC Diploma	: 10/ +2
Post Graduate Skill - IIRDC Diploma	: Bachelor's degree, Master's degree, PHD, PDF etc...

- Sales Return to Unrestricted

Applications of Artificial Intelligence

Course Code: IIRDC-AI-001

Application of AI Tools for Career Development and Professional Content Generation

AI, or Artificial Intelligence, refers to the development of computer systems that can perform tasks typically requiring human intelligence. These tasks include problem-solving, decision-making, learning, speech recognition, and language understanding. AI technologies use algorithms and data to improve efficiency, automate repetitive processes, and enhance decision-making across various fields, including healthcare, education, business, and cybersecurity.

The benefits of this module include enhancing career opportunities by integrating AI tools into job searches, resume building, and professional communication. It improves productivity by streamlining content creation, automating workflows, and optimizing decision-making processes.

This module serves as a comprehensive guide to understanding and utilizing Artificial Intelligence, particularly ChatGPT, in various aspects of career development and daily life. By exploring AI's applications in job search, education, business, cybersecurity, healthcare, and more, readers gain insights into how AI can enhance productivity, decision-making, and efficiency. The module also emphasizes ethical considerations and best practices, ensuring responsible AI usage. Whether for professionals, students, or businesses, this module provides valuable knowledge to help individuals stay competitive in an AI-driven world.

Apostille Attestation

B.Voc / M.Voc, IIRDC Personnel Skill , NSQF / Non-NSQF Certifications

India, since 2005, has been a member of the Hague Convention of October 5, 1961, which abolished the requirement for the legalization of foreign public documents. Apostille is acceptable in all member countries of the Convention (For more info please visit the website: www.hcch.net). Apostille is done for personal documents like birth/death/marriage certificates, Affidavits, Power of Attorney, etc. and educational documents like degrees, diplomas, matriculation and secondary-level certificates etc. As India is a member of the Hague Apostille Convention, 1961, no further attestation or legalization of a document apostilled by a member country, should be required for using such apostilled document in India. An apostilled document should, therefore, be treated as a legalized document for all purposes in India by all concerned, in accordance with the international obligation under the Convention. (Source : https://www.mea.gov.in/apostille.htm) . The HCCH has currently 91 Members: 90 States and 1 Regional Economic Integration Organisation. (Source: https://www.hcch.net/en/states/hcch-members)

Normal attestaion/ Country specific attestation is done for all the countries which are not a member of Hague Convention and where Apostille is not accepted. According to their rules and regulation of that specific country/ attestation body (at the time of attestation) certificate can be applied for attestation. Online verification of certificates can be done through IIRDC website with or without attestation. Some Countries only provide country specific attestation for Specific courses/ programmes only, in that condition candidate can either go for Apostille attestation or IIRDC online verifivation for proving that certificate is genuine.
